## ***Introtek International Broadens Global Presence With Value-Added Distributor***

**Edgewood, New York** – At its Edgewood, New York facility today, Introtek International has announced the successful completion of their exclusive European Distribution Agreement with Sensortekhnics.

Established in 1982, Sensortekhnics was formed as a family-run trading business for basic pressure sensors. It soon extended its activities to include the development and manufacture of high-quality piezoresistive pressure transducers and transmitters. Today, Sensortekhnics employs more than 75 people worldwide.

Sensortekhnics' headquarters and product development center is based near Munich, Germany, where a team of experienced engineers design products for customer specific applications and develop new products for emerging OEM markets. Sensortekhnics has European sales offices in Great Britain, France, Scandinavia and the Netherlands and representatives throughout the world.

"We believe the relationship between the two companies will provide our clients with an unparalleled level of quality, service, and dedication," said Deb Corwin, General Manager of Introtek. "The entire organization stands behind our Company Quality Policy."

"We are looking forward to a very long and successful relationship between our two companies and continue to serve our loyal customers for their application requirements," stated Joe Mariano, Engineering Manager of Introtek.

Introtek International has been custom-designing and manufacturing non-invasive ultrasonic sensors since 1982, and has been a wholly owned subsidiary of Magnetrol since 1986. The sensors have been utilized for applications that have included the detection of air bubbles in tubing, and liquid levels in containers. Introtek also offers sensors for drip chamber applications as well as optical sensors for blood leak detection.
